PROSTHODONTICS & IMPLANT RESTORATIONS

COMPLETE YOUR PROSTHODONTICS TRAINING

This two-day course of didactic and hands-on training is designed for dental professionals who aspire to gain the knowledge and skills required to provide full arch fixed dental implant therapies.

The primary focus being:

WHAT. WHEN. WHY. HOW

www.dentalimplanttrainingce.com

CONVENTIONAL MAXILLARY DENTURE MANDIBULAR HYBRID

As the culture of the aging patient population requiring the replacement of teeth continues to shift away from removable therapies and toward implant fixed therapies, the average dental practitioner will be forced with a decision to make. Either succumb to the negative impact of increasing referrals to those capable of providing fixed therapies or acquire the knowledge and skills necessary to provide said fixed therapies.

Dr. Charette is committed to educating practitioners for both their own professional growth and success, as well as, their future patients outcomes and experiences.

Dr. Jyme Charette is excited to guide you through **WHAT** to look for, **WHEN** and **WHY** to choose full arch therapy, and **HOW** to massively improve your patient's dental circumstances and lives.

Here you will learn the most efficient and well validated processes to make you more confident and your practice more successful.

FACULTY:

DR. JYME CHARETTE, DMD

Dr. Charette attended the University of Louisville School of Dentistry for his DMD, Prosthodontic Certificate and MSD in the Art of Dental Science. Dr. Charette is board certified with the American Board of Prosthodontics and primarily focuses his work on fixed implant and combinations of implant and removable therapies.

Dr. Charette is devoted to strengthening the sense of community amongst dental practitioners, particularly between the specialty and general dental arenas. Dr. Charette has a genuine interest in helping others provide quality care to their patients and encourages correspondence from those who seek a friendly prosthodontic resource.
